

Assistance Relief

Leverage the Power of Prepaid for Assistance

Prepaid for Assistance Relief

Payments as a Lifeline (PaaL) was created as an industry coalition of top payments companies - enabling Charities, Foundations and Governments to electronically deliver funds to individuals in need - controlled for spend, fraud and abuse. With FIS and PaaL in partnership, we are here to create a best in class FINANCIAL relief program.

- Payment solution created by a payment leader committed to humanitarian aid.
- Flexible, adaptable payments solutions
- Accelerated implementation
- Automatic account of every dime spent.

When a natural disaster strikes families are instantly left with little or no access to fundamental financial needs. When there is a national crisis, the government needs to disburse the money as quickly as possible. In these cases, this relief money is an important step in rebuilding the lives of these individuals or families. To this fact, FEMA paid more than \$7.2B in disaster relief to residents and municipalities through individual and public assistance programs.

To support a simple, turnkey solution FIS has created a assistance relief program. A prepaid solution that meets the mandate of quick delivery and access to funds in times of natural disasters or federal/state assistance relief. This new solution provides individuals with near real-time access to funds which allows them to quickly start rebuilding their lives.

Charities/Non-Profits/State/ Federal Agency - Benefits

- Near real-time delivery of relief money
- Reduce costs; no checks
- Increase recipient satisfaction
- Control all funds spend, fraud and abuse

Recipient Benefits
